

TACTICAL HOLSTERS

GENERAL USE INSTRUCTIONS

IDS line of Tactical Holsters and Accessories is constructed of a reinforced Injection-molded high quality nylon.

Each holster consists of Two main units:

1. The holster itself (Either Level 1 / Level 2 / Multi Carrying Holster).
2. The back-side adapter: Paddle / Belt-Loop / Low-Ride / Molle / Thigh Rig. All accessories are 360°. For further info see inner pages.

The holster unit can be attached to any of the back-side adapters according to the user's preference / specific operational requirement. Back-side adapter can be easily replaced at any time. Allen key is provided within the package.

HOLSTERS FEATURES (SEE OPTIONAL CONFIGURATIONS IN THE INNER PAGES):

Retention Holster – Trigger guard retention can be adjusted according to user's preference by using the Allen key supplied with the holster.

Thumb Lock Holster provides a level 2 retention and allows a quick and safe presentation of the pistol. Trigger guard retention level can be adjusted as in the retention holster.

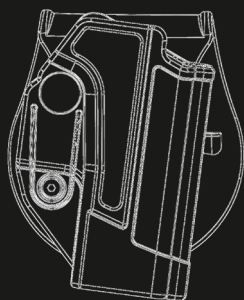

Multi Holster – offers a wide variety of carrying options (Left/Right/IWB/OWB) – All in One modular solution. The perfect configuration for organizations as one holster fits all.

Double Magazine Pouch – available for Polymer or Steel magazines. Features the same characteristics as the retention and thumb lock holsters.

SAFETY WARNINGS FOR IDS TACTICAL HOLSTERS

Warning! Any and all firearms are considered dangerous. As such they should be handled with extreme care.

IDS holsters are designed to fit specific firearms and to provide solutions for different user's preferences.

Prior to using the holster, users must first verify the compatibility of the holster to their firearm.

While doing so, the firearm must be unloaded, without rounds in the chamber and with no magazine.

While using IDS holsters, the user must make sure that all manufacturer safety instructions are kept.
